A principal as old as time - Balance. The perpetual play of Yin and Yang, heaven and earth; male and female forces in their eternal search for equilibrium. Being centered nourishes us, gives us strength and serenity, but it also is equally precious and fleeting. We are about to enjoy a truly astonishing display of balance, a combination of acrobatics and solo musical performance full of aesthetics and harmony. It's a symbolic representation of life and of love: magical, and yet so very fragile. Let me take you to a place, where the strength of balance and the fragility of the music are effortlessly fused, creating a „Melody of Balance“.
